Brand Foundation

Healthcare Training Center is a people-first training platform for healthcare professionals. Built by a lawyer whose personal story drives the mission: this system is broken, but you can be the change in it.

Core Values

Trustworthy

Credentialed, legally sound, professionally authoritative. We know healthcare law and compliance inside out.

Warm

Patient-centered, human, never condescending. We speak like a trusted mentor who happens to be an expert.

Empowering

Learners leave more capable than when they arrived. We're here to help you succeed and make a difference.

Clear

No jargon when avoidable, no confusion, no bureaucratic language. Direct communication, always.

Core Promise

Healthcare professionals who complete training here treat people better — not because the law says they have to, but because they understand why it matters.

Color System

The primary palette combines deep navy authority with teal interaction. The five training rooms each have a distinct accent color that permeates the entire experience when entered.

Primary Palette

Deep Navy --color-navy #1E3A6E <i>Primary brand, nav, headers</i>	Teal --color-teal #2B8FA9 <i>Interactive, links, highlights</i>	White --color-white #FFFFFF <i>Card backgrounds, content</i>	Surface Gray --color-surface #F4F6F9 <i>Page backgrounds, inactive states</i>	Border --color-border #D0D8E8 <i>Dividers, input borders</i>
Success --color-success #28A745 <i>Completion, passed assessments</i>				

The Five Training Rooms

Each room has its own color identity. When a learner enters a room, the entire UI shifts to reflect that room's subject and color.

ROOM 1

Customer Service

Communication, empathy, de-escalation

#3B7DD8

ROOM 2

HIPAA, Privacy & Security

PHI, privacy rule, breach prevention

#2BA89A

ROOM 3

Compliance

Laws, fraud/waste/abuse, ethics

#2EAA6E

ROOM 4

Medical Records

EHR, documentation, retention

#7B5EA7

ROOM 5

Finance

Revenue cycle, billing, collections

#D4A017

Typography

The brand uses Montserrat for headings (geometric, authoritative) and Inter for body copy (screen-optimized, readable). Playfair Display is reserved for certificates only.

Display Type

DISPLAY / 48PX / EXTRABOLD / MONTSERRAT

Step Inside. Step Up.

Your Progress Today

Body Copy

BODY LARGE / 18PX / REGULAR / INTER

Healthcare professionals who complete training here treat people better — not because the law says they have to, but because they understand why it matters.

BODY / 16PX / REGULAR / INTER

This room covers the HIPAA Privacy Rule, the Security Rule, and how to identify and report a potential breach. You'll learn practical strategies for protecting patient information in your daily work.

BODY SMALL / 14PX / REGULAR / INTER

Last updated on June 4, 2026. Estimated completion time: 45 minutes. Difficulty: Intermediate.

Certificate Display (Playfair Display)

CERTIFICATE DISPLAY / 28PX / BOLD / PLAYFAIR DISPLAY

Certificate of Completion

ph-headset

Voice & Tone

Warm authority. Credentialed and legally sound, but never bureaucratic or condescending. The brand sounds like a trusted mentor who happens to be an expert.

Brand Personality

- **Trustworthy:** Credentialed, legally sound, professionally authoritative
- **Warm:** Patient-centered, human, never condescending
- **Empowering:** Learners leave more capable than when they arrived
- **Clear:** No jargon, no confusion, no bureaucratic language

Copy Guidelines

- **Person:** Speak to learners as "you"; the organization is "we"
- **Casing:** Title Case for headers, sentence case for body copy, UPPERCASE for badges and labels
- **Taglines:** Love the rule of three — "Enter. Learn. Lead." / "Learn. Grow. Make a Difference."
- **Why framing:** Every room carries a "Why This Room Matters" note written from a patient-advocacy lens
- **Emoji:** Never used. The brand reads as professional.

Copy Examples

- *"Your Path to Better Care Starts Here"* — lobby welcome
- *"Where Healthcare Teams Get It Right"* — confidence without arrogance
- *"Train With Purpose. Care With Confidence."* — outcome-focused
- *"Hi! We're here to help you succeed."* — help desk voice
- *"Ask your admin to unlock."* — locked room tooltip

Usage Guidelines

Do's

- Use navy + teal as your primary color combo
- Apply room colors purposefully — use them to show room identity, not decoration
- Keep layouts clean and spacious (generous section breaks)
- Respect the 8px spacing grid throughout
- Always include visible focus states for keyboard navigation
- Test color contrast — meet WCAG 2.1 AA minimum (4.5:1 text, 3:1 UI)
- Use Phosphor icons exclusively for all UI iconography
- Keep motion purposeful — respect prefers-reduced-motion

Don'ts

- Don't use heavy gradients or busy textures — keep the brand clean
- Don't invent new colors — stick to the palette provided
- Don't use emoji for iconography — use Phosphor icons instead
- Don't make marketing copy sound cold or clinical
- Don't sacrifice accessibility for aesthetics
- Don't use the room colors interchangeably — each room = one specific color
- Don't create decorative animations — motion signals state change only
- Don't use Playfair Display outside of certificates

Spacing & Layout

- **Base unit:** 8px grid throughout
- **Section breaks:** 48–96px vertical padding between major sections
- **Content width:** 1280px maximum, centered
- **Mobile first:** Design for 375px mobile up to desktop
- **Card padding:** 24px (--space-5) default
- **Border radius:** 16px for room/feature cards, 8px for buttons and course cards
